

Press release

The new J8 twin – The compact automatic coffee machine with two grinders for two different coffee varieties

Niederbuchsiten, ## – **A speciality coffee with or without caffeine? Dark espresso roast or a mild lungo blend instead? The J8 twin from JURA comes equipped with two high-performance conical grinders. Combining two coffee machines in one, this is the first in the compact class to offer the best of both worlds. Two different bean varieties are used to create unique beverages, either pure or blended, at the touch of a button. Coffee pleasure every time – freshly ground, not capsuled. With the J8 twin, there is also the option to top off chosen beverages with delicately sweetened milk foam, serving up an entirely new world of taste. Made possible by Swiss engineering expertise, which is behind state-of-the-art technology such as the P.A.G.3⁺ grinder and the Sweet Foam function.**

Two P.A.G.3⁺ high-performance conical grinders

The J8 twin opens up a whole new world of coffee enjoyment. Capable of processing two different coffee varieties, it provides a host of options that cater to all tastes. Regardless of whether you prefer your speciality coffee decaffeinated in the evenings or want to combine different roasts, the J8 twin can make it happen. The clever design of the compact J8 twin means it comes equipped with two high-performance P.A.G.3⁺ grinders. In addition to delivering reliable precision, these grinders actively monitor grind consistency while also featuring aroma control and a harmonious sound design. Between preparations, the grinders remain in rest mode. This is gentler on the grinders and extends their service life while ensuring consistently delectable flavour.

Specialities to suit every individual taste

The J8 twin can prepare 32 delicious specialities. With two ceramic disc grinders, the machine boasts maximum flexibility when it comes to creating tasty beverages. Every coffee is made to meet personal taste, always freshly ground with your favourite coffee variety, strong or mild, regular or decaf. In short, it boasts the advantages of two coffee machines in one compact machine. And yet this talented all-rounder can do even more. It's possible to flavour the milk foam to give it a subtle sweet note and thus open up an entirely new world of taste. From the classic espresso to the on-trend Sweet Latte, there is something for everyone here.

Results at the tip of your finger

The Panorama Coffee Panel enables you to use all the benefits of the J8 twin intuitively. Precise and logical, this operating concept is self-explanatory. The sliders in Easy Mode also ensure maximum flexibility when adapting a speciality to the preferred cup. Assistance systems make operation even easier, while aroma control ensures the correct grind consistency. The Coffee Eye intelligent cup sensor ensures the cups are always placed under the correct spout for the chosen speciality. And, of course, cleaning and maintenance are also possible at just the touch of a button.

Peak performance in a compact, clever design

Two ceramic disc grinders have been neatly designed to fit into one compact, elegant machine. With clean lines, high-quality materials and superior craftsmanship, the J8 twin is a sophisticated piece of equipment. The attention to detail is clearly expressed in elements such as the grind consistency setting, the height-adjustable coffee spout and the grinder lids. Form and function seamlessly combine to create a coordinated unit, at the centre of which is the Panorama Coffee Panel. In combination with subtle design highlights, the choice of colours superbly complements the lines of this exceptional coffee machine.

JURA Elektroapparate AG, founded in 1931 and based in Niederbuchsiten, Switzerland, is the innovation leader in automatic speciality coffee machines. The company's products stand for the perfect coffee result from fresh beans, always freshly ground and extracted at the touch of a button. The product range includes both machines for domestic use and professional models. In recent years, the long-established Swiss brand has grown to become a global player, operating in around 50 countries.
